

Trimay® is a global leader of wear related solutions, 100% Canadian owned and operated business, with manufacturing facilities in Canada. Trimay® commenced operations in the 1950's as a manufacturer of wear plate, and has evolved into a world class manufacturing and fabrication centre of wear plate and wear pipe products, as well as a distributor of a number of wear resistant related products, including: welding consumables, VR connectors, rubber liners, and belt cleaners.

All of our products are designed and manufactured to withstand wear, which extends component life and reduces the frequency of shutdowns, by using our innovative solutions to optimize resistance to abrasive, corrosive and/or impact wear. Trimay® is focused on wear resistant materials and has invested heavily in our people, equipment, and R&D in order to provide a wide range of overlay materials, products and services.

## Services

### Fabrication

Trimay® is able to provide fabrication services, both in house with our cutting, forming and welding capabilities, as well as with our close partnerships with a variety of fabrication shops.

### Plant Audits

Trimay® offers an in-person and site-specific review of facilities to analyze processes in high wear application, in order to come up with custom tailored suggestions and solutions.

### Lunch and Learns

Trimay® provides in-house and virtual lunch and learn sessions as an education tool on both wear related issues, as well as options for overcoming.

# AGRICULTURE / GRAIN

Wear Plates, Wear Pipes, Connectors, Consumables, Rubber, Coatings, Belt Cleaners and more.

## HIGH PERFORMANCE INDUSTRY

Our manufacturing facility in Edmonton, Alberta, Canada has consistently embraced innovation to provide a superior level of excellence, as we provide full and specific solutions for every customer.
